

Definitive Surgical Trauma Course

This multidisciplinary masterclass is designed for consultant or post fellowship trainees in anaesthesia, surgery and nursing to come together and develop strategic thinking and decision making in the management of the severely injured patients and to provide them with the practical anaesthetic skills to manage these patients. This includes simulation and high fidelity workshops with surgeons and nurses focusing on major haemorrhage and anaesthetic support of the trauma patient. The multidisciplinary approach provides valuable insight into the unique viewpoint and challenges each discipline faces when dealing with the severely injured patient.

Lectures attended will be claimable in your ANZCA CPD portfolio under Knowledge and Skills "Learning sessions" for one credit per hour. Workshops will be claimable in your ANZCA CPD portfolio under Knowledge and Skills "Shorts Courses, Workshops" for two credits per hour. Emergency response workshops attended will be claimable in your ANZCA CPD portfolio under the CICO and Major Haemorrhage categories.
