

ETM Course

EMERGENCY TRAUMA MANAGEMENT COURSE

The definitive trauma course for doctors who manage trauma

ABOUT THE ETM COURSE

ETM is a 3-day face-to-face course teaching trauma reception and resuscitation from the Australasian Emergency Medicine perspective. Designed by Emergency physicians, ETM Course focuses on practical trauma resuscitation, trauma team leading and trauma team member skills.

ETM Course is designed primarily for emergency registrars and physicians but is also relevant to registrars and fellows of all specialties involved in trauma reception and resuscitation, including Intensive Care, Anaesthetics, Surgery, Retrieval and rural/remote General Practice.

COURSE FEATURES

Short, focused lectures, simulation scenarios and small group interactive sessions including:

- **RRM:** Resus Room Management – modern ED team leading/ team member skills
- **Airway:** Standard/difficult/failed intubation, cricothyroidotomy
- **Chest:** Decompression – needle/finger/tube thoracostomy
- **Vascular access:** Rapid Infuser Catheter (RIC) line and intraosseous needle (EZ-IO) insertion
- **Orthopaedic:** Spinal immobilisation, pelvic binder, CT-6 femoral traction splint application
- **Other procedures:** CAT/SOF tourniquet application, lateral canthotomy
- **Management:** Management of traumatic cardiac arrest
- **Radiology:** Trauma x-ray, CT and FAST scan interpretation
- **Transport:** Transport and retrieval of the trauma patient
